AI-Powered Call Review System Complete UI/UX Analysis | API Contract | Component Breakdown
Total Screens: 4 | Total Routes: 6 | Date: 2026-05-26

COMPLETE ROUTE MAP

Route	Screen	Notes
/calls/reviews	Call Reviews List	Main review queue — tabbed under /calls
/calls/reviews/:reviewId	Call Review Overview	Pre-review overview page
/calls/reviews/:reviewId/evaluate	Scorecard Evaluation	Core scoring form with audio
/calls/reviews/:reviewId/coaching	Coaching Feedback	Coaching notes + tags post-scoring
/calls/reviews/:reviewId/summary	Review Summary	(Implied) — after coaching, before submit
/calls/analytics	History & Analytics	Performance trends + review history

Review Flow (Step-by-step):

1. /calls/reviews → Select a review
2. /calls/reviews/:reviewId → Read AI insights
3. /calls/reviews/:reviewId/evaluate → Answer scorecard questions
4. /calls/reviews/:reviewId/coaching → Add coaching feedback
5. /calls/reviews/:reviewId/summary → Confirm + Submit

SCREEN 1 — Call Reviews List

Screen Name: Call Reviews List **Route:** /calls/reviews **Purpose:** Landing screen showing all call reviews.
Primary entry point for accessing individual reviews.

Navigation Structure:

- Top tabs: Calls | History & Analytics
- Sub-tabs under Calls: All Calls (count) | Call Reviews (count: 5)

Components

Table — Call Reviews List Columns:

- Call Title (clickable blue link) + Scorecard Name below in gray
- Account
- Call Date (date + time)
- Type (badge: Discovery / Demo / Negotiation / Closing)
- Duration (mm:ss)
- Priority (High / Medium — color-coded)
- Status (Pending / In Progress / Completed / Overdue)
- AI Flags (multiple tags: High Risk Deal, No Next Steps, Objection Issue, Negative Sentiment, New Rep)
- Due Date (clock icon, red if overdue)

Search Bar

- Placeholder: "Search by rep, call title, or account..."
- Full-width above table

Filter Dropdowns (4)

- All Status → Pending | In Progress | Completed | Overdue
- All Priority → High | Medium | Low
- All Call Types → Discovery | Demo | Negotiation | Closing | Follow-up
- Sort → Newest First | Oldest First | Due Date

Result Count

- Text: "Showing X of Y calls"

User Actions

- Search by rep, call title, or account
- Filter by Status / Priority / Call Type
- Sort the table
- Click row → Navigate to Call Review Overview

APIs

1. GET /api/call-reviews Purpose: Fetch paginated list of call reviews
Request:

- page
- size
- search (rep, title, account)
- status (Pending | In Progress | Completed | Overdue)
- priority (High | Medium | Low)
- callType (Discovery | Demo | Negotiation | Closing)
- sort (newest | oldest | dueDate)

Response:

- reviewId
- callTitle
- scorecardName
- account
- callDate (datetime)
- callType
- duration (mm:ss)
- priority
- status
- aiFlags (string[])
- dueDate
- totalCount

States to Handle

- Loading → Skeleton rows in table
- Empty → "No call reviews found" + reset filter option
- Error → API failure toast notification
- Overdue row → Due date shown in red
- Multiple AI flags → Multiple colored pill badges inline

Dynamic Data (Dropdowns)

- Status values — hardcoded enum or GET /api/meta/statuses
- Call Type values — GET /api/meta/call-types OR hardcoded

SCREEN 2 — Call Review Overview

Screen Name: Call Review Overview **Route:** /calls/reviews/:reviewId **Purpose:** Pre-review page.

Reviewer reads AI insights and call context before starting evaluation. Also allows scorecard change and reviewer reassignment.

Layout: Two Column

- Left (wide): Call Summary card + AI Insights card
- Right (narrow, sticky): Scorecard panel + Action buttons

Components

Call Summary Card (Left)

- Call Title (blue link)
- Sales Rep name
- Customer / Account
- Date & Time
- Duration
- Call Type badge
- Deal Linked
- Call Source (e.g. Zoom)
- Participants (pill tags: Sarah Chen (Rep), John Smith (VP Sales), Mary Johnson (Ops Manager))

AI Insights Card (Left)

- AI Summary — paragraph text
- Key Highlights — bulleted list
- Talk Ratio — dual progress bar (Rep % vs Customer %)
- Sentiment Summary — with trend icon
- Risks Detected — warning cards (yellow background)

Scorecard Panel (Right — Sticky)

- Assigned Scorecard name
- Version (e.g. v2.3)
- Review Mode badge (AI-Assisted)
- Due Date (with clock icon)
- Status badge (Pending / In Progress / Completed)
- [Start Review] — primary dark blue button
- [Call Details] — secondary with external link icon
- Change Scorecard — dropdown selector
- Reassign Reviewer — dropdown (You / other users)

- [Mark as Not Applicable] — ghost button
- Quick Stats: Duration | Participants count | Topics count | Action Items count

User Actions

- Click "Start Review" → Navigate to Scorecard Evaluation
- Click "Call Details" → Open call detail
- Change Scorecard → Dropdown select → Update scorecard assignment
- Reassign Reviewer → Dropdown select → Update reviewer
- Mark as Not Applicable → Mark review as N/A

APIs

1. GET /api/call-reviews/:reviewId Purpose: Fetch full review details

Response:

- reviewId
- callTitle
- salesRep
- customer
- dateTime
- duration (mm:ss)
- callType
- dealLinked
- callSource
- participants → [{name, role}]
- aiSummary
- keyHighlights (string[])
- talkRatio → {rep: 45, customer: 55}
- sentimentSummary
- sentimentScore (e.g. 65)
- risksDetected (string[])
- scorecardName
- scorecardVersion (e.g. v2.3)
- reviewMode (AI-Assisted | Manual)
- dueDate
- status
- reviewer
- quickStats → {topics, actionItems}

2. GET /api/scorecards Purpose: Populate Change Scorecard dropdown

Response:

- scorecardId
- scorecardName

Observed values: Discovery Call Scorecard, Demo Call Scorecard, Negotiation Scorecard, Closing Call Scorecard, Follow-up Call Scorecard

3. GET /api/users Purpose: Populate Reassign Reviewer dropdown

Response:

- userId
- userName

4. PATCH /api/call-reviews/:reviewId Purpose: Update scorecard or reviewer

Request:

- scorecardId? (optional)
- reviewerId? (optional)

5. POST /api/call-reviews/:reviewId/mark-na Purpose: Mark review as Not Applicable

Response:

- success (boolean)
- status

States to Handle

- Loading → Skeleton for both cards
- Error → Failed to load review details
- Status badge → Pending=yellow | In Progress=blue | Completed=green | Overdue=red
- Talk Ratio → Two bars must always total 100%
- Risks → Warning icon + yellow background card per risk

SCREEN 3 — Scorecard Evaluation

Screen Name: Scorecard Evaluation **Route:** /calls/reviews/:reviewId/evaluate **Purpose:** Core review screen. Reviewer scores each question section by section. AI suggestions shown with confidence scores. Linked to call transcript and audio player.

Layout: Two Column

- Left panel (~220px): Audio player + Transcript / AI Insights toggle
- Right panel (main): Scorecard sections with questions

Components

Page Header

- Back arrow link (← Back)
- Call title (H1)
- Sub-title: "Sarah Chen • Discovery Call Scorecard v2.3"
- Progress: "X of 11 Questions" + progress bar (top right)
- [Save Draft] button
- [Continue to Coaching →] primary button (disabled until required questions answered)

Left Panel — Audio Player

- Playhead / timeline scrubber (00:00 to 45:23)
- Skip back / Play-Pause / Skip forward buttons
- Speed selector (1x | 1.25x | 1.5x | 2x)
- Tab toggle: Transcript | AI Insights
- Search transcript input
- Transcript: timestamped entries → MM:SS • Speaker — message text (scrollable)
- AI Insights tab: Cards — Strong Discovery (green) | Missing: Next Steps (yellow) | Good Rapport (green)

Right Panel — Scorecard Sections

- Section accordion (collapsed/expanded) with title + "X/Y" score badge
- Observed sections: Opening (0/3) | Discovery (0/4) | Product Fit (0/2)
- Each question shows:
 - Question text (required marked with *)
 - AI Suggestion pill (confidence %) + [Accept] button
 - AI-suggested answer text
 - Timestamp link (e.g. 0:15) → jumps to transcript
 - Answer options (Yes/No OR 1–5 rating)
 - Coaching comment textarea (optional)
 - [Mark as N/A] button (bottom left)
 - [Jump to timestamp] link (bottom right)

Answer Types:

- Yes / No — binary toggle buttons (✓ Yes | X No)
- 1–5 Rating Scale — 5 number buttons, selected = navy filled

User Actions

- Play / pause / scrub audio
- Change playback speed
- Switch Transcript / AI Insights tabs
- Search transcript
- Click timestamp → jump to audio position
- Accept AI suggestion → pre-fills answer
- Manually select Yes/No or 1–5 rating
- Type coaching comment (optional)
- Mark question as N/A
- Click "Jump to [timestamp]" → scrubs audio
- Save Draft → auto-save progress
- Continue to Coaching → navigate to Coaching Feedback screen
- Back → return to Call Review Overview

APIs

1. GET /api/call-reviews/:reviewId/scorecard Purpose: Fetch scorecard questions, sections, and AI suggestions

Response:

- sections[]
 - sectionId
 - sectionTitle (Opening | Discovery | Product Fit | etc.)
 - totalQuestions
 - questions[]
 - questionId
 - questionText
 - required (boolean)
 - answerType (yes_no | rating_5 | text)
 - aiSuggestion
 - value (suggested answer text)
 - confidence (0–100)

- transcriptRef (MM:SS)
 - transcriptSnippet (quote)
- existingAnswer (draft)
- existingComment (draft coaching comment)
- totalQuestions (e.g. 11)
- answeredCount

2. GET /api/call-reviews/:reviewId/transcript Purpose: Fetch timestamped transcript

Response:

- entries[]
 - timestamp (MM:SS)
 - speaker
 - text

3. GET /api/call-reviews/:reviewId/ai-insights Purpose: Fetch AI insight cards for left panel

Response:

- insights[]
 - type (positive | warning | info)
 - title (e.g. "Strong Discovery")
 - description

4. POST /api/call-reviews/:reviewId/answers Purpose: Save a single question answer (auto-save on each answer)

Request:

- questionId
- answer (true/false for yes_no | 1–5 for rating | string for text)
- isNa (boolean)
- coachingComment? (optional)
- aiAccepted (boolean)

5. POST /api/call-reviews/:reviewId/save-draft Purpose: Save full draft

Response:

- success (boolean)
- savedAt (datetime)

States to Handle

- Progress bar → updates on each answered question
- Section header counter → "Opening 0/3" updates live
- AI Suggestion badge → green >80% | yellow 60–80% | orange <60%
- Accept AI → highlights suggested answer + increments progress
- N/A → clears answer, shows N/A label, counts as answered
- Rating 1–5 → selected = navy fill, others = outline
- Yes/No → selected gets check/X and fills
- Jump to timestamp → scrubs audio + highlights transcript row
- Continue to Coaching → active only when all required (*) answered
- Save Draft → toast "Draft saved"

SCREEN 4 — Coaching Feedback

Screen Name: Coaching Feedback **Route:** /calls/reviews/:reviewId/coaching **Purpose:** Reviewer provides structured coaching feedback after scoring. Includes strengths, improvement areas, coaching notes, recommended actions, internal notes (hidden from rep), tags, and share toggle.

Layout: Single column, full-width cards stacked. Sticky top bar.

Components

Card 1 — Strengths

- Label: "What did the rep do well?"
- Text input — placeholder: "e.g., Excellent rapport building and active listening"
- [+ Add Strength] button — adds another input row
- Each item has X delete button

Card 2 — Areas for Improvement

- Label: "What needs improvement?"
- Text input — placeholder: "e.g., Missed opportunity to confirm budget and authority"
- [+ Add Area] button
- Each item has X delete button

Card 3 — Coaching Notes

- Label: "Detailed feedback for the rep"
- Large textarea — placeholder: "Provide detailed coaching feedback and context..."

Card 4 — Recommended Actions

- Label: "Specific next steps for improvement"
- Text input — placeholder: "e.g., Practice MEDDIC questioning in next coaching session"

- [+ Add Action] button
- Each item has X delete button

Card 5 — Internal Notes

- Subtitle: "Visible only to managers and leadership (not shared with rep)"
- Large textarea — placeholder: "Add internal notes for leadership..."
- NOT shared with rep regardless of Share toggle

Card 6 — Tags

- Label: "Label this review for categorization"
- Multi-select pill toggles:
 - Needs Coaching | Best Practice | Escalation Risk | Compliance Concern
 - Follow-up Needed | Great Discovery | Poor Closing | Strong Closer | Good Rapport
- Selected = navy fill | Unselected = outline
- Multiple tags can be selected simultaneously

Card 7 — Share Feedback with Rep

- Toggle switch (on/off)
- Label: "Make this feedback visible to the sales rep"
- When ON → rep sees all feedback except Internal Notes

User Actions

- Add strength / area / action items (dynamic row add)
- Delete individual rows (X button)
- Type coaching notes
- Type internal notes (private)
- Select/deselect tags (multi-select)
- Toggle Share with Rep on/off
- Save Draft
- Continue to Summary → navigate to Review Summary
- Back to Scorecard → return to Scorecard Evaluation

APIs

1. GET /api/call-reviews/:reviewId/coaching Purpose: Load existing coaching draft

Response:

- strengths (string[])
- improvements (string[])
- coachingNotes (string)
- recommendedActions (string[])
- internalNotes (string)
- tags (string[])
- shareWithRep (boolean)

2. POST /api/call-reviews/:reviewId/coaching Purpose: Save / update coaching feedback

Request:

- strengths (string[])
- improvements (string[])
- coachingNotes (string)
- recommendedActions (string[])
- internalNotes (string)
- tags (string[])
- shareWithRep (boolean)

3. GET /api/meta/coaching-tags Purpose: Fetch available tag options

Response:

- tags → [{id, label}]

Observed values: Needs Coaching, Best Practice, Escalation Risk, Compliance Concern, Follow-up Needed, Great Discovery, Poor Closing, Strong Closer, Good Rapport

Validations

- All fields optional — no required validation
- Max length coaching notes: confirm with backend (suggest 2000 chars)
- Individual inputs: suggest 500 char max
- Filter empty strings before API submission

States to Handle

- Empty → all cards show single empty input with placeholder
- Add item → new row appended
- Delete item → row removed, others shift up
- Loading → skeleton for all cards on GET
- Save Draft → toast "Draft saved"
- Share toggle ON → confirm rep will receive feedback

SCREEN 5 — Review History & Analytics

Screen Name: Review History & Analytics **Route:** /calls/analytics **Purpose:** Analytics dashboard showing review trends, team/rep performance, score trends over time, common tags, and filterable review history.

Layout:

- Top: 4 KPI stat cards (full-width row)
- Middle: Score Trend chart (65% left) + Focus Areas (35% right)
- Bottom: Common Tags (35% left) + Review History list (65% right)

Components

KPI Cards (4)

- Rep Average Score → % + trend arrow + "vs last month"
- Team Average → % + context note ("Your rep is above average")
- Completion Rate → % + "Reviews completed on time"
- Total Reviews → count + "This period"

Score Trend Chart

- Bar chart
- X axis: weekly dates (Apr 1, Apr 8 ... May 13)
- Y axis: score (0–100)
- Score label above each bar
- Navy filled bars

Focus Areas Panel (Right)

- Title: "Sections with lowest average scores"
- List: Section name + % + colored progress bar
- Observed: Objection Handling 68% | Discovery - Decision Process 72% | Next Steps Clarity 75%
- Color: red/orange <70% | yellow 70–79% | green 80%+

Common Tags Widget

- List: tag name + count
- Observed: Needs Coaching 12 | Strong Discovery 8 | Best Practice 6 | Poor Closing 5

Review History List

- Search field: "Search reviews..."
- Filters: All Reps dropdown | Last 30 Days dropdown
- Each entry:
 - Call title
 - Reviewer name + date
 - Tag pills
 - Score "XX out of 100" (right aligned, large green number)

User Actions

- Filter review history by rep
- Filter by date range
- Search review history
- Click history entry → Read-only completed review detail

APIs

1. GET /api/analytics/summary Purpose: KPI card values

Response:

- repAvgScore (e.g. 82)
- repScoreTrend (e.g. +4)
- teamAvgScore (e.g. 78)
- teamComparison (above | below | same)
- completionRate (e.g. 87)
- totalReviews (count)

2. GET /api/analytics/score-trend Purpose: Weekly bar chart data

Response:

- trendData[] → {week, score}

3. GET /api/analytics/focus-areas Purpose: Lowest scoring sections

Response:

- focusAreas[] → {sectionName, avgScore} sorted ascending

4. GET /api/analytics/common-tags Purpose: Tag frequency counts

Response:

- tags[] → {tag, count} sorted descending

5. GET /api/analytics/review-history Purpose: Paginated review history

Request:

- repId? (optional)
- dateRange (last_30 | last_90 | custom)
- search? (optional)

- page
- Response:
- reviews[]
 - reviewId
 - callTitle
 - reviewerName
 - reviewedAt (datetime)
 - tags (string[])
 - score (out of 100)
 - totalCount

States to Handle

- Loading → shimmer/skeleton for all cards, chart, lists
- Empty history → "No reviews found for this period"
- Chart empty → instruction to complete reviews
- Focus area colors → red <70% | yellow 70–79% | green 80%+
- KPI trend → green up arrow positive | red down arrow negative

REUSABLE COMPONENTS SUMMARY

Component	Used In	Notes
StatusBadge	Screen 1, 2	Pending/In Progress/Completed/Overdue — color per status
PriorityBadge	Screen 1	High/Medium/Low — color coded
CallTypeBadge	Screen 1, 2	Discovery/Demo/Negotiation/Closing
AIFlagPill	Screen 1	Multi-flag pills per row
AllInsightCard	Screen 2, 3	positive (green) / warning (yellow) / info
ScorecardPanel	Screen 2	Right sticky panel
TalkRatioBar	Screen 2	Dual progress bar (Rep% + Customer%)
AI suggestionBlock	Screen 3	Suggestion + confidence % + Accept button
RatingScale	Screen 3	1–5 buttons, selected = navy fill
YesNoToggle	Screen 3	✓ Yes
DynamicInputList	Screen 4	Add/remove input rows
TagSelector	Screen 4	Multi-select pill toggle
ShareToggle	Screen 4	On/off toggle
KPICard	Screen 5	Stat + trend icon + context label
BarChart	Screen 5	Weekly score trend
FocusAreaList	Screen 5	Section + % + colored bar
SaveDraftButton	Screen 3, 4	Consistent across review flow/

SCREEN 6 — Review Summary

Screen Name: Review Summary **Route:** /calls/reviews/:reviewId/summary

Purpose: Final confirmation screen before submitting the review. Shows overall score, section-by-section breakdown, AI suggestion analysis stats, and coaching feedback preview. Reviewer can edit or submit from here.

Layout: Single column, full-width cards. Sticky top bar.

Components

Page Header

- Back link: "← Back to Coaching Feedback"
- Page title: "Review Summary"
- Subtitle: "Review and submit your evaluation"
- [Edit] button — secondary (top right)
- [Submit Review →] button — primary navy (top right)

Readiness Banner

- Green banner: "Review Ready for Submission — All required fields are completed"
- Shows only when all required questions answered

Overall Score Card

- Large circular score display: "88 out of 100" (green circle)
- Score label: "88% - Passing"
- Progress bar with Pass threshold marker (e.g. "Pass threshold: 75%")
- Scorecard name | Version | Rep name (3 columns below bar)

Section Scores Card

- Title: "Section Scores"
- Each section: Name + Score fraction + % + green progress bar
- Observed sections:
 - Opening → 18 / 20 (90%)
 - Discovery → 35 / 40 (88%)
 - Product Fit → 18 / 20 (90%)
 - Objection Handling → 17 / 20 (85%)

AI Suggestion Analysis Card

- 3 stat boxes side by side:
 - AI Answers Accepted → count (green background)
 - AI Answers Modified → count (yellow background)
 - AI Answers Rejected → count (red/pink background)

Coaching Feedback Preview Card

- Title: "Coaching Feedback"
- Read-only preview of coaching entered in Screen 4
- (Scrolls below fold — Strengths, Areas for Improvement, Notes visible)

User Actions

- Click [Edit] → Navigate back to Scorecard Evaluation to make changes
- Click [Submit Review] → Submit and navigate to Submission Success screen
- Click [Back to Coaching Feedback] → Return to Coaching Feedback screen

APIs

1. GET /api/call-reviews/:reviewId/summary Purpose: Fetch all computed summary data for this screen

Response:

- overallScore (number — e.g. 88)
- overallPercent (number — e.g. 88)
- passingStatus (string — "Passing" | "Failing")
- passThreshold (number — e.g. 75)
- scorecardName
- scorecardVersion
- repName
- sectionScores[]
 - sectionName
 - scored (number — e.g. 18)
 - total (number — e.g. 20)
 - percent (number — e.g. 90)
- aiAnalysis
 - accepted (number)
 - modified (number)
 - rejected (number)
- coachingPreview
 - strengths (string[])
 - improvements (string[])
 - coachingNotes (string)
 - recommendedActions (string[])
- isReadyForSubmission (boolean)

2. POST /api/call-reviews/:reviewId/submit Purpose: Final submission of the review

Request: (no body required — submits all saved draft data)

Response:

- success (boolean)
- reviewId
- submittedAt (datetime)
- finalScore (number)
- finalPercent (number)
- visibility (string — "Shared with Rep" | "Not Shared")

States to Handle

- Readiness banner: green = all required answered | hide or show warning if incomplete
- Pass threshold marker on progress bar: visual tick at threshold %
- Score color: green if passing, red if failing
- Section score bars: color coded by % (green 80%+ | yellow 70-79% | red <70%)
- All stat boxes: always show all 3 even if count is 0
- [Submit Review] button: disabled if isReadyForSubmission = false
- Loading: skeleton for all cards

SCREEN 7 — Submission Success

Screen Name: Submission Success **Route:** /calls/reviews/:reviewId/reaubmitted (or modal/overlay on summary route) **Purpose:** Confirmation screen after review is successfully submitted. Shows a summary of what was submitted and provides next action options.

Layout: Centered card on blank page (no sidebar, no nav clutter)

Components

Success Card (Centered)

- Large green checkmark circle icon (top center)
- Heading: "Review Submitted Successfully"
- Sub-text: "Your review has been saved and shared with the appropriate team members"
- Detail grid (2 columns):
 - Call Title → "Discovery Call - Acme Corp Q2 Initiative"
 - Sales Rep → "Sarah Chen"
 - Final Score → "88 / 100 (88%)"
 - Submitted By → "You"
 - Submission Time → "May 15, 2026 at 2:45 PM"
 - Visibility → green dot + "Shared with Rep"
- [View Submitted Review] — primary full-width navy button
- [← Back to Queue] — secondary ghost button (left)
- [Share] — secondary ghost button (center)
- [Export] — secondary ghost button (right)

User Actions

- Click [View Submitted Review] → Navigate to Submitted Review Detail screen
- Click [Back to Queue] → Navigate back to /calls/reviews list
- Click [Share] → Open share modal/flow
- Click [Export] → Download review as PDF/export

APIs

1. GET /api/call-reviews/:reviewId/submitted Purpose: Fetch submission confirmation data

Response:

- callTitle
- salesRep
- finalScore (e.g. 88)
- finalTotal (e.g. 100)
- finalPercent (e.g. 88)
- submittedBy
- submittedAt (datetime)
- visibility ("Shared with Rep" | "Not Shared")

2. POST /api/call-reviews/:reviewId/export Purpose: Trigger export/download of

submitted review

Response:

- downloadUrl (string — presigned URL or blob)
- fileName (string)

3. POST /api/call-reviews/:reviewId/share Purpose: Share the review with additional people

Request:

- recipientEmails (string[])
- message? (string, optional)

Response:

- success (boolean)

States to Handle

- Visibility dot: green dot if "Shared with Rep" | grey dot if not shared
- Submission time: formatted as "Month DD, YYYY at H:MM AM/PM"
- [Share] and [Export] → can be disabled/hidden if feature not available
- No loading state needed (navigated here after successful submit POST)

SCREEN 8 — Submitted Review Detail (Read-Only)

Screen Name: Submitted Review Detail **Route:** /calls/reviews/:reviewId/view (or /calls/history/:reviewId) **Purpose:** Read-only view of a completed/submitted review. Used when accessing reviews from Review History. Shows full score breakdown, coaching feedback, call details, review metadata, and audit trail. Reviewer can Reopen, Clone, Export, or Share.

Layout: Two column

- Left (wide): Overall Score + Section Breakdown + Coaching Feedback
- Right (narrow): Call Details panel + Review Info panel + Audit Trail panel

Components

Page Header

- Back link: "← Back to Review History"
- Page title: Call name (e.g. "Negotiation - Global Enterprises Contract")
- Sub-title: "Jennifer Kim • Negotiation Scorecard v2.1"
- Action buttons (top right):
 - [Reopen Review] — secondary with refresh icon
 - [Clone] — secondary with copy icon
 - [Export] — secondary with download icon
 - [Share] — primary navy with share icon

Overall Score Card (Left)

- Circular score: "88 out of 100" (green)
- Label: "88% - Passing"
- Full-width green progress bar
- AI Suggestion Analysis inline (3 boxes):
 - AI Accepted → 12 (green bg)
 - AI Modified → 5 (yellow bg)
 - AI Rejected → 2 (red/pink bg)

Section Breakdown Card (Left)

- Title: "Section Breakdown"
- Each section: Name + Score (X / Y) + % + green progress bar
- Observed sections (Negotiation scorecard):
 - Opening → 18 / 20 (90%)
 - Value Articulation → 35 / 40 (88%)
 - Pricing Discussion → 25 / 30 (83%)
 - Closing → 10 / 10 (100%)

Coaching Feedback Card (Left)

- Title: "Coaching Feedback"
- Strengths label (green) + bulleted list
- Areas for Improvement label (red/orange) + bulleted list
- Coaching Notes — paragraph text
- (Read-only, no editing)

Call Details Panel (Right)

- Customer
- Date & Time
- Duration

- Call Type badge
- Deal name (blue link)

Review Info Panel (Right)

- Submitted By
- Submitted At (datetime)
- Visibility (green dot + "Shared with Rep")
- Scorecard Version

Audit Trail Panel (Right)

- Title: "Audit Trail"
- Timeline list with clock icon per event:
 - Review Created → User • datetime
 - Review Started → User • datetime
 - Review Submitted → User • datetime

User Actions

- [Reopen Review] → Reopen completed review for editing → navigates back to Scorecard Evaluation
- [Clone] → Duplicate review (for another rep or call)
- [Export] → Download review as PDF
- [Share] → Share review with others
- Back to Review History → Return to /calls/analytics

APIs

1. GET /api/call-reviews/:reviewId/view Purpose: Fetch complete read-only submitted review data

Response:

- callTitle
- repName (reviewer)
- scorecardName
- scorecardVersion
- overallScore (number)
- overallPercent (number)
- passingStatus ("Passing" | "Failing")
- aiAnalysis → {accepted, modified, rejected}
- sections[]
 - sectionName
 - scored
 - total
 - percent
- coaching
 - strengths (string[])
 - improvements (string[])
 - coachingNotes (string)
 - recommendedActions (string[])
- callDetails
 - customer
 - dateTime
 - duration
 - callType
 - deal
- reviewInfo
 - submittedBy
 - submittedAt
 - visibility
 - scorecardVersion
- auditTrail[]
 - event (string — "Review Created" | "Review Started" | "Review Submitted")
 - user (string)
 - timestamp (datetime)

2. POST /api/call-reviews/:reviewId/reopen Purpose: Reopen a submitted review for editing

Response:

- success (boolean)
- newStatus ("In Progress")
- redirectUrl (string — back to evaluation screen)

3. POST /api/call-reviews/:reviewId/clone Purpose: Clone a review (creates new draft based on this one)

Request:

- targetCallId? (string — optional, if cloning for different call)

Response:

- newReviewId (string)
- redirectUrl (string)

4. POST /api/call-reviews/:reviewId/export (same as Screen 7)

5. POST /api/call-reviews/:reviewId/share (same as Screen 7)

States to Handle

- All fields read-only — no input elements
- Audit trail: chronological order, oldest first
- Visibility dot: green = shared | grey = not shared
- Section bars: color coded by %
- [Reopen Review]: only shown if user has permission to reopen
- Coaching sections: hide Strengths/Improvements sections if empty

SCREEN 9 — All Calls List

Screen Name: All Calls **Route:** /calls (default sub-tab — All Calls) **Purpose:** View all sales calls regardless of review status. Similar to Call Reviews list but broader — includes calls not yet assigned for review, and additional call types (Check-in, Follow-up). Acts as the master call log.

Layout: Same table layout as Screen 1

Components

Navigation

- Top tabs: Calls (active) | History & Analytics
- Sub-tabs: All Calls (count: 8, active) | Call Reviews (count: 5)

Table — All Calls Same columns as Screen 1 (Call Reviews list):

- Call Title + Scorecard Name
- Account
- Call Date (date + time)
- Type (badge — includes additional types: Check-In, Follow-Up vs only Discovery/Demo/Negotiation/Closing in reviews)
- Duration (mm:ss)
- Priority (High / Medium / Low)
- Status (Pending / In Progress / Completed / Overdue)
- AI Flags (pill badges)
- Due Date

Additional Call Types visible (vs Screen 1):

- Check-In (new)
- Follow-Up (new)

Search Bar

- Placeholder: "Search by rep, call title, or account..."

Filter Dropdowns (4) — same as Screen 1

- All Status | All Priority | All Call Types | Sort

Result Count

- "Showing 8 of 8 calls"

Difference vs Screen 1 (Call Reviews)

- Shows ALL calls including those with no review assigned
- Includes extra call types: Check-In, Follow-Up
- Total count is higher (8 calls vs 5 reviews)
- Same columns and filter UX

User Actions

- Search, filter, sort (same as Screen 1)
- Click row → likely opens call detail or triggers assign-review flow
- Switch to Call Reviews sub-tab

APIs

1. GET /api/calls Purpose: Fetch all calls (not filtered to reviews only)

Request:

- page
- size
- search
- status

- priority
- callType (broader set — includes Check-In, Follow-Up)
- sort

Response:

- callId
- callTitle
- scorecardName (if assigned)
- account
- callDate (datetime)
- callType (Discovery | Demo | Negotiation | Closing | Check-In | Follow-Up)
- duration (mm:ss)
- priority
- status
- aiFlags (string[])
- dueDate
- hasReview (boolean — whether a review exists for this call)
- totalCount

States to Handle

- Same as Screen 1 (loading, empty, error, overdue)
- Rows with no review assigned: no scorecard name shown below call title
- hasReview = false rows: clicking may open "Assign Review" flow instead of review detail

UPDATED ROUTE MAP (All Screens)

Route	Screen	Notes
/calls	All Calls List	Default tab — all calls
/calls/reviews	Call Reviews List	Sub-tab — reviews only
/calls/reviews/:reviewId	Call Review Overview	Pre-review page
/calls/reviews/:reviewId/evaluate	Scorecard Evaluation	Core scoring form
/calls/reviews/:reviewId/coaching	Coaching Feedback	Post-scoring feedback
/calls/reviews/:reviewId/summary	Review Summary	Pre-submit confirmation
/calls/reviews/:reviewId/submitted	Submission Success	Post-submit confirmation
/calls/reviews/:reviewId/view	Submitted Review Detail	Read-only completed view
/calls/analytics	History & Analytics	Trends + review history

Complete Flow:

1. /calls or /calls/reviews → Pick a call/review
2. /calls/reviews/:reviewId → Read overview + AI insights
3. /calls/reviews/:reviewId/evaluate → Score all questions
4. /calls/reviews/:reviewId/coaching → Add coaching feedback
5. /calls/reviews/:reviewId/summary → Review + Submit
6. /calls/reviews/:reviewId/submitted → Success confirmation
7. /calls/reviews/:reviewId/view → Read-only after submission

UPDATED REUSABLE COMPONENTS (additions)

Component	Used In	Notes
CircularScoreDisplay	Screen 6, 7, 8	"88 out of 100" green circle
PassThresholdBar	Screen 6, 8	Progress bar with threshold marker tick
SectionScoreRow	Screen 6, 8	Section name + X/Y + % + progress bar
AIAnalysisStats	Screen 6, 8	3-box: Accepted / Modified / Rejected
CoachingFeedbackPreview	Screen 6, 8	Read-only coaching display

SubmissionSuccessCard	Screen 7	Centered success state card
AuditTrailPanel	Screen 8	Timeline of review events
ReviewInfoPanel	Screen 8	Submitted By / At / Visibility / Version
ReopenCloneActions	Screen 8	Reopen Review + Clone buttons
